Abstrak

Makanan bergizi dapat meningkatkan kekebalan tubuh dan berguna saat masa pandemi. Crepes dengan beras merah dan ekstrak kulit buah naga merupakan alternatif makanan bergizi bagi masyarakat. Crepes merupakan makanan yang lebih sehat dibanding beras putih. Penelitian ini bertujuan untuk mengetahui kandungan yang lebih baik untuk tubuh. Penelitian ini menggunakan empat formula: Membandingkan tepung beras merah:tepung beras putih:ekstrak kulit buah naga:50%:50%:0%:100%; C2 dengan perbandingan 50%:50%:0%:100%; C3 dengan perbandingan 50%:50%:0%:100%; C4 dengan perbandingan 50%:50%:0%:100%. Hasil uji organoleptik menunjukkan bahwa C4 dengan perbandingan 50%:50%:0%:100% lebih disukai. Penelitian selanjutnya perlu dilakukan mengenai pengaruh penambahan ekstrak kulit buah naga terhadap kandungan gizi crepes.
